Transient Luminous Events : Sprites !

www.heliotown.com

Thomas Ashcroft's New Mexico Radio Observatory!

(and he photographs SPRITES too!)

(do these cause whistlers?)

There was a great sprite producing storm over the Oklahoma panhandle on the March 30, 2012. The jellyfish sprite and the double carrot sprite in the photo above occurred only a few milliseconds apart. The video and radio capture can be seen here: http://www.heliotown.com/Sprites_March302012_0502UT.html
